

PRIVATE INDUSTRY

THE WEATHER SPHERE BRINGS UNIVERSITY, FEDERAL, STATE AND PRIVATE INDUSTRY TOGETHER.

Atmospheric Technology Services Company, LLC

Atmospheric Technology Services Company, LLC (ATSC) is a reliable, high-quality small business alternative to in-house resources for technical services within the atmospheric sciences. These services include operation of government operated weather stations and instrumentation sites, implementation and operation of airborne and ground-based atmospheric sensors, numerical modeling, research support and consulting. ATSC provides a high level of expertise, contacts and confidentiality to develop, implement and maintain successful and economical programs.

ATSC's primary clients are government agencies and commercial concerns that support them. ATSC enables services through carefully chosen high performance teams that represent the industry's best-trained professionals. Using administration, planning and control, financial management and program management, ATSC allows the teams to succeed in their support role in a safe, adaptive manner.

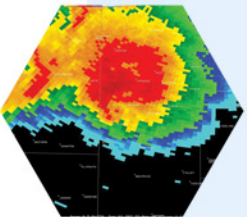

ATSC management has over 30 years of experience working with universities, government agencies and commercial enterprises. They have developed, supported and managed new facilities, instruments and programs, successfully blending cutting-edge technologies with operations. ATSC management has provided expert technical and business reviews of proposals and funding efforts for atmospheric research projects.

Located on the University of Oklahoma Research Campus and as part of the Weather Sphere, ATSC participates in a jointly sponsored Weather Committee by the Norman Chamber of Commerce and the University of Oklahoma's School of Meteorology. This provides academic, government, industry and local business support.

"ATSC enjoys being located on common ground with mutual values and the opportunity to participate in an environment where working together is a benefit to the weather community."
